Deadline for submission of bids: 7 days from the day of the announcement

Method of delivery: The applicant submits the full bid to komisijanabavki@redcross.org.mk

with Subject -Offer for a vehicle for sanitary transport of mobile users

1) Overview of objectives

Within the second pillar of the project "Integrated care and support service business development in the RCNM ", supported by the Austrian Development Agency, Austrian Red Cross, Swiss Red Cross and Red Cross of the Republic of Macedonia is the piloting and further development of the service for the elderly population, the service Emergency button.

As an integral part of the service, is the establishment of sanitary transport and procurement of appropriate vehicles that will be used to transport users, in situations where it is not an emergency, and the person due to immobility or limited mobility can not use public transport.

60 older men and women in Macedonia will be selected as beneficiaries of the newly introduced model, with a monthly fee for using the Emergency Button service in the Republic of Northern Macedonia.

The emergency button will be a 24/7 service, which the users of the elderly population will be able to use in their homes, by pressing the alarm device, intended to be worn, whenever they find themselves in a condition that is not life-threatening, but is serious enough and needs urgency, first aid and support (injury, broken limbs, accidental fall, wound bleeding, burn injuries, medical emergencies, allergic reactions, etc.), as well as their appropriate, fast and reliable transport to relevant institutions.

With the increasing trend of the aging population in the Republic of Northern Macedonia, the demand for integrated care and support services for older women and men is currently much higher than the supply. The Red Cross of the Republic of North Macedonia (RCNM) is a nationally recognized, professionally experienced provider of health and social assistance to older men and women in need of assistance.

The project "Integrated care and support service business development in the RCNM" supports the Red Cross to continue to offer quality provision of services for integrated care and support for older women and men by developing a comprehensive business model for sustainable service and delivery in within its organization, inspired by the Austrian and Swiss experiences for the efficient operation of care services for the elderly.
